Timed AP Exam Practice #1

From calculus, we know the volume of an irregular solid can be determined by evaluating the following integral: Where $A(x)$ is an equation for the cross-sectional area of the solid at any point x . We know our bounds for the integral are $x=1$ and $x=4$, as given in the problem, so now all we need is to find the expression $A(x)$ for the area of our solid.
