Atlas of Fish Histology Histology is the discipline of biology that involves the microscopic examination of thin stained tissue sections in order to study their structure and correlate it with function. Histology can detect signs of disease not easily recognized on gross examination and can therefore be of interest in fish health supervision.

It seems that, hitherto, no information on histology of fish had been published and this is an attempt to fill the gap. The authors have produced an excellent book. A well-written text is accompanied by some 240 good photomicrographs, some of which are in colour. It should quickly promote a knowledge of normal fish tissue, and certain diseases.
