Evaluating ...**

Stoichiometry.

Stoichiometry is the field of chemistry that is concerned with the relative quantities of reactants and products in chemical reactions.

For any balanced chemical reaction, whole numbers (coefficients) are used to show the quantities (generally in moles) of both the reactants and products.

take part in an engaging investigation. Many of the stoichiometry labs I had done in the past followed more of a traditional structure involving something like, "here is the reaction...predict how much...do the reaction...compare to prediction...determine % yield." While merit for such a lab can be argued for, I really wanted to immerse ...
