us. That's why we've again crawled deep into the Internet to compile this list of 20 places to download free e-books for your use.

How To Use Nikon D3000

When you're just starting out with digital SLR photography, these fully automatic modes on your D3000 can make life easier. Select the mode you want to use from the dial on top of the camera and then just frame, focus, and shoot. For a little extra help, set the Mode dial to the Guide setting to access your camera's step-by-step guided menus.

Nikon D3000 For Dummies Cheat Sheet - dummies

Nikon D3000 with 18-55mm VR lens.
Many lenses have no switches or settings. If so, don't worry. If a lens has an "A - M" switch, like the included 18-55mm VR above, leave it at "A." To get manual focus with the included lens, move it to "M." If the switch says "M/A - M " then use M/A.

There is a temptation amongst those of us that shoot with and test DSLRs for a living to be more than a little dismissive about entry-level cameras like the Nikon D3000. However, first-time DSLR buyers are enormously important to camera manufacturers, and the competition amongst them for a share of the entry-level market is intense. The D60, which is replaced by the D3000, was Nikon's best ...

Nikon D3000 Review: Digital Photography Review

Focusing in very low light can be tricky. Some AF-D prime lenses (which don't autofocus with the D3000) can be easily dialed to infinity. With your AF-S lenses, try to find a bright object on the horizon to autofocus on. Then switch focus on the lens to manual.

Press the shutter-release button halfway to focus, and then press the button the rest of the way down. The self-timer lamp will start to flash and a beep will begin to sound. Two seconds before the photo is taken, the lamp will stop flashing and the beeping will become more rapid.

Self-Timer Mode

The Nikon D3000 is a 10.2-megapixel DX format DSLR Nikon F-mount camera announced by Nikon on 30 July 2009. It replaces the D40 as Nikon's entry level DSLR. It features a 3.0-inch 230,000-dot resolution LCD monitor, CCD sensor with ISO 100–1600 (3200 with Boost) and 3D tracking Multi-CAM1000 11-point AF system which makes it quite similar to the Nikon D200 in these main parts.
