Biology Questions and Answers Form 2 - High School Biology ...

Gas Exchange. In order to see how gas exchange occurs we need to look further into the lungs. Firstly we know that air enters the body through the mouth or nose, from here it moves to the pharynx (throat), passes through the larynx (voice box) and enters the trachea . The trachea splits into two branches, the left and right bronchus, each bronchus divides many times into smaller branches called bronchioles.
