Since this is a high-level document, non-technical language is often used. What is in a software design document? The software design document (SDD) typically describes a software product's data design, architecture design, interface design, and procedural design. The content and organization of an SDD is specified by the IEEE 1016 standard.

Documentation. Your tech spec serves as documentation both during feature implementation and after feature launch. During feature implementation, it specifies exactly what work needs to be done. After launch, it helps uninformed engineers get up to speed quickly on the inner workings of a feature and the tradeoffs involved.

This document will address specific design elements that must be resolved before the ETL process can begin. These include determining:

- Whether it is better to use an ETL suite of tools or hand-code the ETL process with available resources.
- If batch processing will provide the data in a timely manner.
